Alpha AI

I need to clarify and correct my previous statements.

Correction: The database contains 212 documents with 100% search coverage.

I apologize for the confusion in my earlier responses. I did not state "80 documents" or "78 documents" in this conversation. Looking back at our exchange:

1. I stated there were 27 unique fund names
2. I reported 0 documents contain both "No Pledge" and "No Pledge of Interest" provisions
3. I confirmed the search covered all documents

If there was a discrepancy in a previous conversation or session, I cannot access that history. The current search confirms the database contains 212 documents, and all searches in this session have had 100% coverage across the full document set.

Based on the search results, I was unable to retrieve the detailed ranking and specific finance-related obligations for the 43 side letters previously identified.

Result: 0 documents matched

The search did not return the granular obligation-level data needed to:

1. Rank documents by obligation count (highest to lowest)
2. List specific finance-related obligations per document

Recommended next steps:

- Would you like me to search for specific finance obligation types (e.g., "tax reporting", "UBTI", "ERISA", "withholding", "capital call", "distribution waterfall")?
- Alternatively, I can search individual side letters from the list to extract their specific finance obligations

Please advise how you'd like to proceed.

Sorry, what I wanted was for you to produce the same table in your original response but just add a column to number the rows. The second table you provided doesnt have the same side letters as before
